

B VISHNU SAI

Aspiring Software Developer | C++, Web Dev

+91 9880869432 | vishnusai0317@gmail.com | <https://www.linkedin.com/in/vishnusai0317>

Summary

Computer Science Engineering student with a strong foundation in Data Structures & Algorithms, OOP, and database systems. Experienced in building full-stack web applications and data-driven solutions using Python and JavaScript. Skilled in backend development, data analysis, and problem-solving, with hands-on experience in real-world projects.

Skills

Programming: C, C++, Python, SQL

Web Technologies: HTML, CSS, JavaScript, Node.js, Express

Databases: MySQL, MongoDB

Tools: Git, VS Code, IntelliJ IDEA

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Computer Networks, SDLC

Development Skills: Debugging, REST API Development, Backend Development, Cloud Basics, Problem Solving, Team Collaboration

Projects

Next-Gen Financial Threat Detection System | Python, Flask, XGBoost, JavaScript, Bootstrap

- Built a full-stack SaaS platform to monitor simulated real-time financial data streams with automated packet routing and Explainable AI (XAI)-based SOC reports.
- Trained an XGBoost machine learning model with dynamic class weighting to handle imbalanced datasets, achieving 88% precision and 85% recall.
- Developed an interactive Single Page Application (SPA) with real-time analytics using Chart.js, including auto-scan functionality and a multi-level anomaly alert system.

Lost & Found Web App | Node.js, Express, MongoDB, Cloudinary, Push Notifications

- Built a full-stack platform for reporting and claiming lost items with authentication, admin workflows, and real-time push notifications.
- Integrated Cloudinary for image uploads and MongoDB Atlas for scalable data storage.
- Developed features like smart match alerts, claim approval/rejection notifications, and advanced item filtering/search.

Early Warning System for Glacial Lake Outburst Floods | NodeMCU, Embedded C, Blynk, IoT Sensors

- Built an IoT-based early warning platform using NodeMCU (ESP8266) to monitor water levels, vibrations, temperature, and GPS data in real time.
- Developed embedded firmware in C to read multi-sensor inputs, process thresholds, and trigger immediate alerts during critical conditions.
- Integrated Blynk cloud dashboard for live monitoring and instant push notifications to remote users.
- Implemented multi-sensor calibration and threshold tuning, improving detection accuracy by 15%.

Education

Bachelor of Engineering (B.E.) – Computer Science Engineering

Rao Bahadur Y. Mahabaleswarappa Engineering College, Ballari

Nov 2022 - Present

CGPA: 8.02 / 10

Awards & Certifications

- Certified in C Programming
- Workshop on IoT

Relevant Coursework

Data Structures, Object-Oriented Programming, Database Management Systems, Computer Networks, Software Engineering
