Python, SQL, C++, Java (Basic).

Libraries

Pandas, NumPy, Matplotlib (Basic), Scikit-Learn (Basic).

Database

MySQL.

Tools

GitHub, Jupyter Notebook, VS Code, MySQL Workbench.

PROJECTS

BikeStores Sales Analytics Project | MySQL, Excel, Data Visualization

- Developed an end-to-end sales analytics project using MySQL and Microsoft Excel on a real-world bicycle retail dataset.
- Performed SQL joins, aggregations, filtering, and business analysis to evaluate store performance, product sales, category contribution, staff efficiency, and revenue trends.
- Built an interactive Excel dashboard using Pivot Tables, Charts, and Slicers for dynamic business insights and decision-making.
- Generated business insights by identifying top-performing stores, best-selling products, staff performance, and monthly sales trends.

Lost & Found Web App | Node.js, MongoDB

- Collaborated in developing and testing a web-based platform for reporting and managing lost items, improving workflow organization and user communication.
- Contributed to system functionality, issue resolution, and data handling to enhance user experience and process efficiency.
- Worked in a team environment to support problem-solving, coordination, and project execution.

INTERNSHIP

Data Science Intern | Contriver

Feb 2026 – May 2026 | Bengaluru, Karnataka

- Worked collaboratively on data analysis and reporting tasks using Excel, SQL, and Python in a team environment.
- Assisted in analyzing datasets and generating insights to support business understanding and decision-making.
- Developed attention to detail, problem-solving, documentation, and analytical skills through real-world project exposure.
- Gained practical experience in teamwork, communication, and managing assigned tasks within deadlines.
